RE: RGD & Associates, Inc. Consulting Engineers

To Whom It May Concern:

I have had the distinct pleasure of working with RGD & Associates, Inc on a number of projects here at The School District of Palm Beach County. During that time RGD & Associates has displayed a level of professionalism and competence in mechanical engineering above and beyond the average consultant. I would definitely say without question that RGD & Associates ranks among the best in the industry for M/E/P/F consulting engineers in the South Florida region and certainly of the consultants serving the District. From their painstaking attention to detail, willingness to cooperate and exceeding scope expectations, the team provides world class service. Every engineering project that we have developed together has run smoothly and efficiently while at the same time meeting our required budgets and schedules resulting in 100% achievement of our goals. That being said, the most important asset of RGD & Associates has been the personal attention and rapid response time they provided on every project regardless of size.

It would be my pleasure to recommend RGD & Associates for any proposed undertaking. If you have any further questions please feel free to call me.

Sincerely,

Terrence Bailey P.E.
Professional Services Supervisor
