Re: Letter of Reference

To Whom It May Concern:

It's with great pleasure that I have the opportunity to write a Letter of Reference on behalf of RGD Consulting Engineers. RGD's collaborative approach coupled with its unremitting work ethic eliminates surprises and controls costs to ensure the seamless completion of every commercial construction project on which it works.

A project's success is often dependent on the team's ability to understand the main purpose and plan. Personnel experience working with RGD has proven that it is a firm with this ability. RGD's holistic approach and integrated in-house services of Mechanical, Electrical, Plumbing and Structural coupled with Fire Protection will save time and money.

RGD Engineers has worked on five distinct projects for Christ Fellowship Church and has efficiently transitioned from typical commercial projects to unique worship and educational assembly use. RGD has designed for CFC from the ground-up, extensive renovations and complete re-engineering of buildings ranging in size of 30,000 to 130,000 square feet.

It is my opinion that a project that has RGD on its team will be a highly successful project for the owner. RGD brings professional excellence, a high level of communication skill and a mindset of being a solution provider. These amazing professional skills coupled with generational personal family ethics, corporate foundations built on God's principles and operated by men of God is truly a winning team.

Please feel free to contact me at your convenience if you would like to talk further.

Blessings,
